TITLE: Communication network terminal supporting a plurality of applications

Application Filing Date (1):

19981030

Detailed Description Text (91):

An example of creating a menu for ringing tones is disclosed in FIG. 10 as a sequence of displays to illustrate what the user sees on the display. The command "NEW RINGING TONES" is sent in a user message to a server of a ringing tone service provider in order to request for latest ringing tones. As a response the server sends a user message containing information relating to the Menu applications for creating a menu, from which the user can select a new ringing tone. The user selects the desirable ringing tone from the menu (selects ring tone `Popcorn`). The selection activates a user message to be sent to the server indicating the desired ring tone. After a while the terminal receives the ring tone from the server. A received ringing tone is indicated to the user using the "RINGING TONE RECEIVED" notification. The user can accept or reject the ring tone. Once the user has given acceptance, the selection menu with the options "Save" and "Playback" displays. If the user selects the Save-option the received ringing tone is saved to the phone and it appears to a ringing tone options menu. The saving is indicated to the user by displaying a "SAVED" confirmation note after which the phone goes to the idle state. If the user selects the Playback-option the received ringing tone is played to the user and after that the original selection list displays again. If the user gives a rejection of the new ring tone, the received ringing tone is discarded, the selection list is removed from the screen, and the phone goes to the idle state.
